

Implementación del Plan de Gestión de Conocimiento y Comunicación 2020-2025 de FONTAGRO

FONTAGRO, in its commitment to promoting sustainable development and innovation in agriculture in Latin America and the Caribbean

United States

FONTAGRO is a catalyst of knowledge that promotes networks and ecosystems of innovation and development in the field of agricultural, agri-food, and rural research and innovation

The implemented initiative

FONTAGRO, through its Technical Administrative Secretariat (STA), is implementing a technical cooperation initiative aimed at increasing FONTAGRO's visibility as a cooperation mechanism in science, technology, and innovation. The objectives include implementing the 2020-2025 KCM Plan, organizing an

event to promote alliances as part of its 25th-anniversary celebration, strengthening capacities to fulfill its mission, and conducting a contest of successful innovation cases, driving scientific and technological activity in LAC and the world.

A continuous effort to drive innovation and development in the region

The technological solution

FONTAGRO has implemented a technology-driven solution focused on capacity building through a comprehensive methodology of specialized workshops and courses. These programs are designed to enhance

skills in writing and designing competitive research projects. The methodology employed is based on a practical, participatory, and easily accessible approach, utilizing virtual courses and webinars.

FONTAGRO drives innovation and the dissemination of science and technology

Results

FONTAGRO celebrated its 25th anniversary by presenting the significant results achieved by this mechanism since its inception. FONTAGRO has implemented workshops and courses to enhance skills in designing competitive research projects, with notable impact on participation and attendee evaluations. Additionally, the IV Contest of Successful Cases of

Innovations in Family Farming 2023-2024 was held, highlighting bioeconomy projects in Colombia, Paraguay, and Venezuela, focused on sustainability and resilience. Currently, FONTAGRO has a schedule of webinars to disseminate results and relevant information for agriculture in Latin America and the Caribbean.
