

# Livestock systems with low emissions of greenhouse gases in Central America

COSTA RICA / HONDURAS / NICARAGUA / PANAMA

Webstory

## The technological solution

Farms intensification based on feeding management and animal load enhanced productivity and lesser GHG emissions.

## Description

Análisis de emisiones de gases de efecto invernadero (GEI) y la rentabilidad de las fincas ganaderas con posterior estimación experimental de los factores de emisión de óxido nítrico y metano acorde al manejo de las fincas en cada región.

## Results

More intensified farms tended to greater productivity and therefore lower GHG emissions. It is necessary to focus on strategies that favor the improvement of diet and productive practices, such as the use of biodigesters that not only collaborate with the reduction of emissions but also propose an alternative use of energy.
