

Characterization of potato biodiversity

ECUADOR / BOLIVIA / COLOMBIA / PERU / VENEZUELA

Webstory

The technological solution

Identification and characterization of the diversity of native potatoes in the Andes, based on defined criteria: morphological, agronomic, organoleptic and functional.

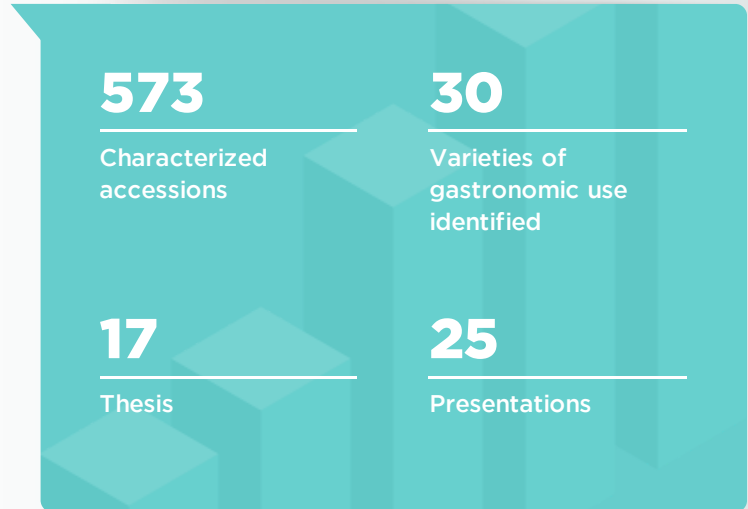

Description

Characterization of the biodiversity of native potatoes, the development and promotion of products for differentiated markets and technological innovations of production.

Results

- Varieties of native Andean potatoes characterized.
- Development of new products based on native potatoes for national and international markets.
- Varieties for gastronomic use identified.
- Revaluation of native potatoes.

PARTICIPATING ORGANIZATIONS

ABOUT FONTAGRO

FONTAGRO is a unique cooperation mechanism for agricultural innovation in Latin America and the Caribbean (ALC) and Spain, that works through regional platforms. It is composed of 15 countries that have contributed capital exceeding 100 million dollars and the Inter-American Development Bank (IDB), which is its legal representative.
