

Water harvesting method adapted to the needs of biointensive orchards

NICARAGUA / HONDURAS / THE SAVIOR

Webstory

The technological solution

Solutions to food security and sovereignty problems through the use of harvesting and water use technologies.

Description

Design of more appropriate water harvest and irrigation systems, at the level of agronomic and hydraulic designs and water requirements for biointensive orchards.

Results

- Biointensive orchards have been established combined with efficient irrigation and water harvesting technologies.
- The method has been disseminated through regional workshops, internships, training centers, international forums, which have allowed the method to scale to new levels in Central America.
