

Dialogue tools for water management

NICARAGUA / COSTA RICA / DOMINICAN REPUBLIC / FRANCE

 Webstory

The technological solution

Integrate farmers and other actors in a dialogue process to reflect on the improvement of water management in banana areas.

Description

Role games called EsperanzAgua and JinotAgua were developed and validated, which consist of the collection of information on the management of water from rural communities through participatory diagnoses, the identification of interactions between water, climate, agriculture and other users, under different climate scenarios.

Results

- Generation of individual and collective learning about water management.
- Collective definition of 29 actions aimed at reducing problems in the use of water.
- Two platforms for territorial dialogue (role play) and their respective guides.
